Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 66 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 66, the language "is comprises in" is confusing and renders the claim indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, 11-18, 20-58, 60-63, 65, 66, 68-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 98/15317.

WO 98/15317 discloses an electrode 10 and a power source 30. One of ordinary skill in the art would have found it obvious to program the switches S1-S4 to effect transporting a molecule from electrode tip 14 to the heart because page 13 teaches the magnitude of a dose is proportional a charge imbalance. Further, page 11 teaches precise control can be maintained over the dosage of the delivered drug based on Faraday's Law of Electrolysis.

Regarding claims 8, 30, 31 and 43-46, one of ordinary skill in the art would have found it obvious to monitor the effects the applied fields and patient drug interaction because it is well known to monitor patient drug therapies for adverse reactions.

Regarding claim 63, the examiner is interpreting the lead system to comprise a catheter.

Allowable Subject Matter

Claims 10, 19, 59, 64 and 67 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Igo et al '895 disclose a related transpericardial delivery system.
